DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-10, drawn to a first method of forming cells, classified in class 29, subclass 623.4.
 - II. Claims 11, 21, 29, 39 and 51-57, drawn to electrochemical cell(s), classified in class 429, subclass 306.
 - III. Claims 12-20, drawn to a method of printing electrolyte patterns, classified in class 29, subclass 623.1.
 - IV. Claims 22-28, drawn to a second method of making cells, classified in class 29, subclass 623.4.
 - V. Claims 30-38, drawn to a third method of making cells, classified in class 29, subclass 623.5.
 - VI. Claims 40-50, drawn to a second method of printing electrolyte patterns, classified in class 29, subclass 623.5.
2. The inventions are distinct, each from the other because of the following reasons: Group II is distinct from the other groups because these cells could be produced by any of the different methods of making the cells as set forth in these other groups. Groups III and VI are distinct from the other method Groups I, IV and V because the former groups require reservoirs for the deposition of the electrolyte, which feature is not part of any of Groups I, IV or V. Group VI is different from Group III because the former uses a masking layer, which layer is not present in

the Group III method. Group V sets forth dual electrolyte layers, a limitation not disclosed in either the Group I or Group IV methods. Finally, Groups I and IV are distinct because Group IV sets forth transfer printing of the electrode layers and also using the adhesive to bond the two web layers together, features not described in the Group I method.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Thomas Ryan on June 27, 2001 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to John S. Maples whose telephone number is 703-308-1795. The examiner can normally be reached on alternate Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gabrielle Brouillette can be reached on 703-308-0756. The fax phone numbers for
